DealPilot — Move the Deal. Stop the Fraud.

The story

A bank lends money to businesses. When a business gets a loan, all its paperwork sits in one shared folder: forms, bank statements, reports, ID papers.

Someone has to read all of it, create the deal, and move it step by step — Intake, Credit, Committee, Product, Committed, Closed — until the money goes out.

It is slow work. And deals get stuck, because nobody notices they are stuck.

The hidden problem

Some deals in the folder are fake. Fraudsters build them from paperwork that looks real. The bank checks every deal against a list of old tricks. But this trick is new. It is not on the list.

One fake deal looks fine by itself. The trick only shows when you look across many deals: the same hidden pattern, again and again — the same shape of documents, the same numbers style, the same names popping up where they should not.

Your job is to see what one deal cannot show you.

Meet the borrowers

- **Maria's Pharmacy.** Borrows every year. Same small amounts. Always on time. Her normal is easy to learn — so a change stands out.
- **Tyler's Startup.** A new company. Messy papers, new suppliers every week. Messy is normal for him. Do not flag him just for being messy.
- **Priya's Bakery.** Needs the money by Friday to pay her staff. For her, slow is bad.
- **James Consulting.** Big numbers, work in many countries. Unusual — but real.

Your job

Build DealPilot: a smart helper that does five things.

1. READ THE FOLDER

When a new deal lands, read its files. Pull out the key facts: who is borrowing, how much, what for, and the terms. Say clearly if something is missing or does not match.

2. MOVE THE DEAL

Walk the deal through the steps, one by one. At each step, check what is needed. Write down what you saw, what you decided, and why.

THIS CHALLENGE STATEMENT IS PROVIDED EXCLUSIVELY TO THE 2026 HACKUTD PARTICIPANTS FOR EDUCATIONAL PURPOSES AND FOR USE DURING THE HACKUTD ONLY. IT IS **NOT** TO BE SHARED WITH THE GENERAL PUBLIC OR ANY EXTERNAL PARTY.

3. ASK A HUMAN

Some choices are not yours: saying yes to credit, signing off, holding a deal for fraud. Stop, tell the right person in plain words, and wait for their answer.

4. SHOUT WHEN IT IS STUCK

Every step has a time limit. If a deal sits too long, raise an alert: whose deal, what it is waiting for, and what would unblock it. If nothing happens, escalate.

5. CATCH THE FAKE DEALS

Watch across all the deals, not just one. When the same hidden pattern shows up again and again, flag it early — in the first few deals, not the last one. Hold the deal before the money goes out. If one slips through, help the team find the rest.

One warning: a strange deal is not always a fake deal. Blocking a good deal is also a mistake. We count both kinds of mistakes.

What we give you

- A folder of loan files for about 12 made-up businesses. Some are complete. Some have missing pages or numbers that do not match. A few are fake.
- One year of old deals, with the old tricks marked — so you can learn what normal looks like.
- The steps, the rules for each step, and the time limits.
- A list of teams and who to contact.
- A pretend clock, so you can fast-forward time and test your alerts.
- One more drop of files during the weekend — new deals, and new papers on deals you already have. The trick in it may look different.

All the data is made up. No real people's information is in it. https://github.com/SushmaEati/HackUTD/tree/main/datasets

How we judge

1. **Did you read the files right?** — the facts you pull out, and whether you spot what is missing or does not match.
2. **Did the deals move?** — steps done in order, nothing stuck without an alert, humans asked at the right moments.
3. **Did you catch the fakes — and leave the good ones alone?** How early you saw the pattern, and how many good deals you wrongly blocked.

And: we will test you on a hidden set of deals, with a different trick. A system that only fits the sample files will fail. Build for the idea, not the examples.

The one idea to remember

One deal can look fine. Look across all the deals. That is where the trick hides.
